Portfolio: portfolio-olive-omega-m86w2jpxuo.vercel.app

PROFESSIONAL SUMMARY

Information Technology graduate (Cum Laude) who takes products from wireframe to production. Experience spans UI/UX design in Figma, full-stack development with React, React Native, TypeScript, Laravel, and C#, backend and API work, testing with Jest and Selenium, and CI/CD deployment across Vercel, Supabase, and Docker-based workflows. Runs an AI-assisted workflow using Claude and Cursor to prototype interfaces and accelerate delivery, refining generated output into production-ready code and designs. Comfortable owning a feature end to end or plugging into a cross-functional team, with project management experience from leading a capstone system from concept to deployment.

PROFESSIONAL EXPERIENCE

Drafturas — Software Developer (Part-time) | Jun 2026 – Present

- Built a canvas-based plan editor UI in React and TypeScript with React Konva, implementing layer and shape manipulation on a custom JSON document schema.
- Developed typed, reusable frontend components using Zustand for state management and Zod for schema validation.
- Integrated the React SPA with a Laravel 12 REST API secured via Sanctum token authentication.
- Implemented optimistic-concurrency handling on save to prevent stale writes across multiple sessions.
- Used an AI-assisted workflow with Claude and Cursor to prototype components and accelerate iteration, refining generated output into production code.

Game MyBiz — UI/UX Designer (Project-based, Remote) | Jul 2026 – Aug 2026

- Designed wireframes, user flows, high-fidelity interfaces, and UI improvements for web applications and internal business tools.
- Generated and iterated UI concepts using Claude, then refined AI output into polished, production-ready designs.
- Maintained reusable components and design-system patterns across screens.
- Contributed server-side: built and integrated backend APIs, and deployed the application to AWS, giving designs a direct path from concept to shipped product.
- Collaborated with developers and the project manager to hand off specs and review implementation.

Sprobe Inc. — Full Stack Developer Intern | Feb 2026 – May 2026

- Managed deployment pipelines and CI/CD workflows using Vercel and GitHub.
- Implemented a live analytics pipeline using Supabase Edge Functions and Apache Iceberg for real-time data processing.
- Used the Supabase CLI for local development and infrastructure management.
- Resolved deployment issues, optimized application performance, and participated in code reviews.
- Collaborated on a location-based rewards mobile application using React Native and Expo.
- Worked in an Agile environment with cross-functional teams and production-ready workflows.

EDUCATION

University of Cebu Lapu-Lapu and Mandaue | 2022 – 2026

Bachelor of Science in Information Technology

Academic Scholar | Dean's Lister | Cum Laude

Capstone Project: SOLMATE — Smart IoT Sun-Tracking Solar Panel System with Mobile Monitoring and Energy Optimization

PROJECTS

SOLMATE — Project Manager & UI/UX Designer | May 2024 – Dec 2025

- Led the planning, coordination, and execution of the capstone project from concept to deployment.
- Designed mobile interfaces and user experience workflows using modern UI/UX principles.
- Assisted in system architecture planning and integration between IoT hardware and cloud services.
- Created technical documentation, user manuals, and project reports for evaluation.
- Used Jest for unit testing of application logic during development.

Trebees System — Front-End Developer & QA Tester | Oct 2024

- Developed responsive web interfaces using Laravel Blade templates, HTML, CSS, JavaScript, and Bootstrap.
- Integrated front-end components with Laravel backend functionality.
- Created and executed automated test scripts using Selenium to validate critical system functionality.

Lathe Machining Services System — Full-Stack Developer | Mar 2024 – May 2024

- Designed and developed a desktop-based service management system using C# and Microsoft Access.
- Built modules for customer management, repair service requests, job tracking, and transaction records, with full CRUD operations.
- Tested and debugged application features and prepared technical documentation throughout the development lifecycle.

TECHNICAL SKILLS

- **AI Tools:** Claude, Cursor, AI-assisted design and development workflows, prompt-driven UI generation and refinement
- **Programming Languages:** C#, PHP, JavaScript (ES6+), TypeScript, Python, Java
- **Frameworks & Libraries:** Laravel, React, React Native, Tailwind CSS, Bootstrap, React Konva, Zustand, Zod
- **Web Technologies:** HTML5, CSS3, REST API Integration
- **Databases & Cloud:** PostgreSQL, MySQL, Supabase, Firebase (Authentication, Cloud Firestore, Realtime Database), Microsoft Access
- **Testing & QA:** Jest, Selenium WebDriver, Unit Testing, Automated Testing, Manual Testing (Functional, Regression), Defect Tracking & Bug Reporting
- **Tools & Platforms:** Git, GitHub, Docker, WSL2, AWS, Vercel, Expo CLI, Visual Studio, Visual Studio Code
- **Design & UI/UX:** Figma, Canva, Wix, Wireframing, Prototyping, Responsive Design, Design Systems
- **Core Competencies:** Full-Stack Web Development, Mobile Application Development, Cloud Deployment, IoT System Integration, Systems Analysis & Design, Agile Methodologies, Project Management, Technical Writing
